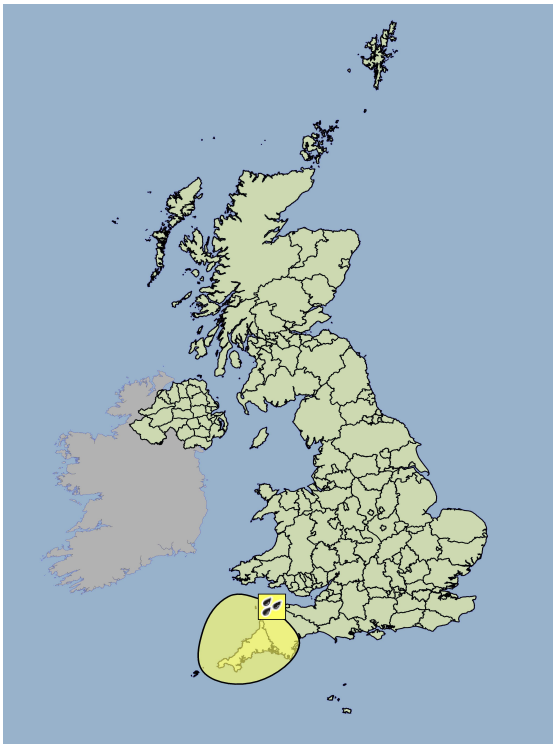
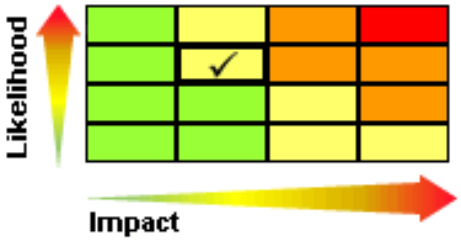
National Severe Weather Warning Service





Chief Forecasters Assessment
A very warm and humid continental airmass will cover much of southwest England. Some heavy showers or outbreaks of thundery rain are likely to drift northwestwards across the region, more especially during the early hours of Thursday into Thursday morning. As yet there remains uncertainty as to the extent of any associated disruption so please monitor the website for possible updates.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Thu, 20th Jun 2013** until **18:00 on Thu, 20th Jun 2013**

Outbreaks of heavy and, at times, thundery rain are likely to move northwestwards across parts of southwest England during Thursday. Some 15-20 mm of rain could fall within 3-6 hours with perhaps over 30 mm locally. The public should be aware of the risk of localised surface water flooding.
